

# BENJAMIN MOORE® SUPER SPEC HP® THINNERS P93, P94, P95

## Super Spec HP® Aliphatic Urethane Thinner P93

This solvent is specifically formulated for use as a thinner for Super Spec HP® Aliphatic Acrylic Urethane Gloss (P74) series. It may be used wherever a strong solvent is required. This solvent will reduce the viscosity of a coating for conventional spray application. It is also suitable for use as a cleanup solvent for painting tools and spray equipment.

## Super Spec HP® Aromatic Thinner P94

This solvent is specifically formulated for use as a thinner for the following products:

P07	Super Spec HP® Universal Alkyd Metal Primer
P14	Shop-Coat Alkyd Metal Primer
P20	Super Spec HP® Rapid Dry Gloss Enamel
P35	Super Spec HP® 100% Solids Epoxy Penetrating Bonding Sealer/Finish
P41	Fast Dry Epoxy Floor Sealer/Finish
P64	Silicone Alkyd Hi-Heat Coating
P78	Super Spec HP® Moisture Cured Urethane Clear

This solvent can be used to adjust the viscosity of the above coatings for conventional spray application. It may be used wherever a strong solvent is required. It is also suitable for use as a cleanup solvent for painting tools and spray equipment.

## Super Spec HP® Epoxy Thinner P95

This solvent is specifically formulated for use as a thinner for the following epoxy products:

P33	Super Spec HP® Polyamide Epoxy Metal Primer
P36	Super Spec HP® Polyamide Epoxy
P45	Super Spec HP® Epoxy Mastic
P72	Super Spec HP® Concrete Patch Repair Kit

This solvent can be used to adjust the viscosity of the above coatings for conventional spray application. It is also suitable for use as a cleanup solvent for painting tools and spray equipment.

### Certification

Available in all regulated areas, except South Coast
